*Increasing Performance, Sustaining Gains*

***MainStream Global Solutions is a veteran owned management consulting firm whose passion is helping our clients increase performance and sustain gains in a culture of continuous improvement.***

## **Program & Project Management**

MainStream GS' senior program and project management consultants provide high value project and program management services to our clients. We understand the critical relationships between an organization's strategy, people, processes, and tools. Our focus is to support and extend your existing program and project management capability with your project management office, project managers, and team leaders to enable high performance across the enterprise. MainStream GS' Program & Project Management service offerings include:

### **Project Assessment**

Our Project Assessment provides an independent assessment of your project at any stage of delivery. Our Project Management Professionals (PMP®) will confirm scope and priority of your work and provide you with a confidential baseline of project earned value performance against the statement of work and cost/schedule.

### **Project Leader Training**

Our Project Leader Training will allow you to quickly extend your organization's project management capabilities without stressing your existing resources. Our Project Management Professionals (PMP®) will facilitate the development of your existing project managers through mentoring, formal training, and working shoulder-to-shoulder with your staff.

### **Project Delivery**

Project Delivery gives you're the flexibility to strengthen your delivery while minimizing your risks, allowing you to quickly extend your program and project management capabilities across the entire organization. Our Project Managers will work in a support role to your project manager, oversee your project manager, or serve as a project manager.

### **Project Portfolio Management**

Project Portfolio Management enables program management offices to more effectively manage a collection of related programs and/or projects. We support and strengthen linkages that may be in place, as well as initiate linkages that need to be created. Our focus is placed on strategic alignment, prioritization based on difficulty/impact, creation of project flow, and waste elimination.

### **Project Management Essentials**

Project Management Essentials provides focused training and coaching for Team Leaders who are not project managers; however, need the essentials of project management process and best practices to support their ongoing participation and/or leadership in projects.

### **Disaster Management & Recovery**

When disasters such as floods, earthquakes, hurricanes, tornados, ice storms, hit communities or regions, recovery requires a disciplined decision making process based on experience with business, civil society and government. We bring a project management approach that helps develop resilient communities better equipped to recover from disasters.
